DEL Exhibiting at the CV Operators Show

DEL Equipment (UK) Limited is pleased to announce that they will be attending this year's Commercial Vehicle Operators Show at the NEC in Birmingham. DEL's stand this year focuses on their safety first awareness campaign, with details of their comprehensive range of platform side guards on display. Each guard available offers handling solutions for a varied range of working environments such as the auto erect for the gas bottle market. This style of guard is fixed permanently to the lift and when it is opened, the guards automatically surround the platform. This allows the operator to store the gas bottles against the guards and strap them in position making the load safe. This style, like all the guards, is based on DEL's emphasis of maximising operator protection. For more information, please visit DEL's stand 5269.
